

OLIST MARKETPLACE PERFORMANCE

Stakeholder Summary | September 2026

Purpose

Provide leadership with a concise view of marketplace sales, delivery performance, customer satisfaction, geography and seller performance.

Executive Snapshot

KPI	Value	Interpretation
Total Sales	13.59M	Sales represented in the sales fact
Total Orders	99K	Distinct orders
Average Order Value	137.75	Average sales value per order
Average Review Score	4.09	Average customer review score
On-Time Delivery	94.16%	Delivered orders meeting estimate
Delivered Orders	96K	Distinct delivered orders
Late Orders	8K	Delivered orders after estimate
Average Delivery Days	12.41	Average actual delivery duration

Key Business Insights

1. Revenue concentration: Health & Beauty (~1.26M), Watches & Gifts (~1.21M), Bed, Bath & Table (~1.04M), Sports & Leisure (~0.99M), and Computers & Accessories (~0.91M) are among the highest-revenue categories displayed.

Action: Monitor category revenue contribution and changes in category mix over time.

2. Geographic delivery variation: Overall on-time delivery is 94.16%, while the displayed state-level average delivery time ranges from approximately 9 days in SP to approximately 29 days in RR.

Action: Investigate states with longer delivery times, logistics constraints and estimate accuracy.

3. Delivery and satisfaction: The state-level delivery-delay versus review-score visual shows variation across states in both measures.

Action: Use delivery performance as a diagnostic factor when investigating customer satisfaction; the visual does not establish causality.

Recommended Focus

Area	Management focus
Category performance	Monitor leading categories and changes in revenue contribution.
Logistics	Investigate states with longer delivery times and late-delivery exposure.
Customer satisfaction	Combine review analysis with delivery-delay and category context.
Growth reporting	Use like-for-like periods for meaningful YoY comparisons.

Scope note: The final report contains six pages. Payment data is present in the model, but a separate Payments page is not shown in the final six-page report. Drill-through was requested in the original brief but was not verified from the final screenshots.

Important: The 2017 YoY figure in the Sales Performance Matrix is inflated by the incomplete 2016 comparison period and should not be treated as a normal full-year growth rate.
